Sir:

LETTER EXPLAINING APPLICATION DIFFERENCES

The specification of the captioned CIP application differs in a few respects from parent application 10/058,137, filed January 29, 2002. Some of the changes are editorial, some of the changes involve deletion of Fig. 15 of the parent application. Although Fig. 15 was referenced as showing a "conventional example", Applicant does not believe that Fig. 15 is prior art and does not qualify for a prior art rejection.

The changes are described below with reference to the page and line numbers of the parent application.
